A pre-bid meeting was held on 22nd December, 2013 at 10:00 am. at TEDCO offices– West Bank for the parties involved in the project who are: PEA representative, TEDCO representative, and some of the bidders after the site visit to the proposed area in which the PV project for producing electricity will be installed with a capacity of 350 kWp, , and the following points were discussed during the meeting:

A brief description By PEA representatives about the project was presented about the bid, the purpose of the pre-bid meeting, and they informed the bidders that all the requests of the clarifications can be presented by the bidders in the meeting and PEA will prepare a minutes of meeting including the questions raised and will be sent to all bidders for their reference. PEA will prepare responses to these clarifications and any written clarification that it receives and send it to all bidders ASAP.

After that, the committee gave the bidders the chance to raise their questions, and the following clarifications were received:

1. Provide us with the area maps of land and make Contour for the heights in order to assess the required Reclamation.
2. Regarding the mechanism of Monitoring System, where shall the data be stored? and who shall provide the line access?
3. Provide us with Software copy for Bidding document.
4. For the DC side cables, companies request a confirmation regarding the cable size, as the determined size in the bid document which is 16 mm² is not appropriate.
5. Does the potential induced degradation(PID) is required?
6. Could you extend the deadline for Submission of the bidding documents for another two weeks?
7. It is a requirement that all parts of the Joint Venture, consortium to have a valid certificate for the contractor union?
